THRESHHold® Real MSM Plus Gel (topical application)

COMPOSITION

Each 100 gram contains:	
Methylsulphonylmethane (OptiMSM®)	10g
Ledum palustre herba sicc.T.	5g
Hypericum perf. herba rec.T.	7,5g
Ruta graveolens herba rec .T.	7,5g
Propylene glycol/aqua	70g

PHARMACOLOGICAL CLASSIFICATION

D 34.13 Other (Health Supplement)

PHARMACOLOGICAL ACTION

Will assist with the treatment of painful conditions in hands, ankles, feet and joints.

Methylsulphonylmethane (MSM) acts as a natural anti-inflammatory. Sulphur seems to be important in the strength and maintenance of joint tissue, especially cartilage, as it helps the body's own repair and maintenance systems work better. Sulphur is a major component in tissue repair. MSM is a naturally occurring nutrient that provides the body with essential sulphur and methyl groups that are used in the healing and repair processes.

Ledum palustre – assists with the healing of fibrous tissue of small joints.

Hypericum perforatum – for the injury to parts rich in sentient nerves especially fingers and toes. Has neurotrophic properties that induces the survival, development, and function of nerve cells.

Ruta graveolens – assists with the healing of fibrous tissue, flexor tendons, joints, ankles and wrists.

INDICATIONS

THRESHHold® Real MSM Plus Gel is an adjunct measure in conditions of painful fingers, toes, ankles, wrists and joints. The gel is indicated for external use in assisting in temporary relief of pain and difficult mobility of joints in hands, wrists and ankles.

CONTRA-INDICATIONS
